

BenPal™

Let our technology change the way you view **Flexible Benefits**

With the BenPal integrated benefits management system, you can run your Flex scheme more efficiently with more control and more... flexibility.

Plug it in.
Empower your people.
Reap the rewards.

BenPal is a 2nd generation platform that addresses many of the issues encountered in current Flex and Voluntary schemes. It's the new, common sense way to run benefits.

Pete Whittington
Benefits Director
JLT Online Benefits

Life assurance 4 × scheme salary (£222,220)	NET	£0.00
Totals		£50.00

Benefits

Selecting benefits is an engaging, educational process for employees, with everything visible on the same page and drill-downs to more information. Automated, personalised messaging via laptop, PC and mobile devices helps to keep employees in touch.

BenPal can be the system that employees use to manage all their company benefits, core and voluntary, pension as well as risk and health, with options of dynamic Reward Statements and links to external discount and savings portals.

Control

With BenPal, employers have more flexibility and real control. HR and Finance have instant access to accurate data and MI. New processes with benefit providers remove inefficiencies and save money and hassle. Automated underwriting reduces any exposure to uninsured liabilities. New benefits can be introduced at any time, not just at the Flex renewal.

This is a platform that can sit at the heart of an online benefits strategy, both in the UK and internationally.
